**19 OR LESS**

If you scored 19 or less, it may be an indication that your asthma is not under control.

**20 OR MORE**

If you scored 20 or more, your asthma seems to be well controlled.

Asthma is unpredictable. Your asthma symptoms may seem mild or nonexistent, but they can flare up at any time. Take the Asthma Control Test periodically no matter how good you feel. When your asthma is controlled, you should expect to be MORE active and have FEWER symptoms.
